SKILL SET

Programming Languages: C
Scripting Languages: Bash, Python, Javascript
Web Technologies: HTML, CSS
Database Systems: MySQL
Libraries, API, Tools: JQuery, GraphAPI , Facepy

Frameworks: Django, Web2py
Programming Environments: Vim (Moderate)
Version Control: Git

PROJECTS

1. Created an Image Viewer in Web2py whereby a user can upload the pics and create an album and also view the album in a slideshow and comment on other users album photos.
2. Created a simple ping pong game in javascript.
3. Built a database query engine using PHP and MYSQL on a Hospital database .
4. Built a mini-Kernel in Linux.
5. Made an Analytics project for dressy@imagine implemented in DJANGO Framework. The user can try the apparel, share it on facebook or share it on G+ Based on the actions the user performs we track the information like device, operating system, browser, country, IP, date, time etc when the action was performed and store it in the backend. Based on these we build piecharts and bar graphs to depict the appropriate information for the merchants.
6. Made a carom board game in 2D implemented in OpenGL and c++.

INTERESTS

1. I like contributing to open source. I am an active contributor to Sysers Portal at Anita Borg Institute.
2. I like coding especially based on DataStructures.
